What can you spot?

We've joined BIAZA's 'Spotted on Site' Campaign along with dozens of UK and Irish zoos.

It's a campaign to find and record native flora and fauna - from birches to bees. This has been contributing to thousands of records, benefitting science.

The data helps people to know what species call the zoo their home, which in turn helps zoos to conserve their local species.

And the best part? You can get involved too:

1. Search for and Download [Seek] or the [iNaturalist App] on your Android or Apple device.
2. Use the app to photo and record native life you see during your visit (not the zoo animals!)
3. Any flora/fauna you log will automatically be added to this zoo's project page.

And that's it! You can check out all the sites and observations via QR code below.
