What can you spot?

We've joined BIAZA's 'Spotted on Site' Campaign along with dozens of UK and Irish zoos & aquariums.

It's a campaign to find and record native flora and fauna - from birches to bees. This has been contributing to thousands of records, benefitting science.

The data helps to know which species call the site their home, which in turn helps conserve local species.

And the best part? You can get involved too:

1. Search for and Download [Seek] or the [iNaturalist App] on your Android or Apple device.
2. Use the app to photo and record native life you see during your visit (not the zoo or aquarium animals!)
3. Any flora/fauna you log will automatically be added to this site's project page.

And that's it! You can check out all the sites and observations via QR code below.
